

■ Lawnmower VSS 53 K60 HW

- Generously sized wheels on ball bearings, 200 mm front and 280 mm rear, to guarantee smoother running over uneven ground and better handling of the machine.
- Centralised cutting height with reinforced ergonomic lever, adjustable to 5 different positions, from 28 mm to 75 mm.
- Spacious 60-litre fabric bag which means longer periods of uninterrupted operation between one emptying stop and the next.
- Standard issue mulching blades ensure finely chopped clippings that take up less space in the grass catcher.
- Overhead valve (OHV) engine design guarantees top performance in any operating conditions, and high torque even at low crankshaft speeds.
- Engine equipped with dual filter (foam + paper element) affording maximum protection and dependable long-term performance.
